

# ACTIVE ALIGNERS

## THE CLEAR SOLUTION TO YOUR BEST SMILE

Modern orthodontics to suit your Lifestyle.

## THE ACTIVE ALIGNERS DIFFERENCE

- Transparent
- Comfortable
- Removable
- Easy to clean
- Eat whatever you want
- 4-6 Dental visits

# THE BENEFITS OF ACTIVE ALIGNERS

Active Aligners provide you with a comfortable, removable, transparent, predictable and effective means to straighten your teeth and get a smile worth showing.

## WHY CHOOSE ACTIVE ALIGNERS?

- Final outcome is predicted thanks to CAD (computer aided design) and individualized treatment planning. Outcomes are more predictable.
- Recent studies have shown that aligner treatment is usually faster than traditional braces
- All trays are delivered together to the dentist. A patient therefor does not need adjustments every couple of weeks but simply needs to change trays every 2 weeks (or can be sooner at Doctor discretion and patient compliance) with follow up appointments every 6 weeks – this means less chair time for both Doctor and patient
- More flexibility in food choices allowing for healthy eating habits to be maintained
- No cutting of lips and cheeks by brackets - more comfortable
- Allows for better and more convenient oral hygiene, plaque control (limits the risk of white spots and gingival inflammation), periodontal health (less irritation of soft tissue) and overall comfort
- Transparent – allows for self-confidence
- Fewer emergencies if compared to traditional braces – no need to miss work due to broken appliances or injury during contact sport.

## ARE YOU A CANDIDATE?

- **Only fully erupted permanent dentition (no primary teeth or erupting teeth). Young teens qualify if all their adult teeth have fully erupted, usually around 13 to 14 years of age.**
- You need to be to be committed, motivated and responsible - compliance is key
- Aligners must be worn up to 22 hours a day. If not, traditional braces may be a better option.

# IT'S AS EASY AS 1, 2, 3!

## Step 1

First impressions don't always have to last

Your Active Aligners dental professional will arrange a 3D scan or have impressions taken to determine your candidacy.

## Step 2

Get your smile perfectly aligned

Once your treatment plan and simulated best or optimal smile is approved by your dental professional, your Active Aligners will be manufactured and ready for collection in approximately 2 weeks.

Before

After

## Step 3

Keep your new smile forever!

Once your Active Aligners journey is complete, be sure to wear your retainers included in your Active Aligners package, to ensure your new smile lasts forever.

*love your smile*

# Active Aligners make Smiles perfectly Simple

An alternative to traditional braces, Active Aligners are known in the dental industry as clear aligner therapy.

They are clear custom made trays worn in sequence.

**SMILE CONFIDENTLY!**
